

# Sina Zinsaz

Front-End Developer

---

## Summary

---

A Front-End Developer from Kashan, focused on designing, developing, and debugging websites to create modern and user-friendly experiences. Dedicated to delivering high-quality work with attention to detail and a passion for solving challenges.

## Experience

---

### Arman team

09/2023 – Present

#### Front End Developer

As a key member of the development team, I contributed to expanding and debugging the dashboard, achieving significant improvements in the following areas:

- Improved debugging speed by 65%, ensuring system stability.
- Enhanced codebase scalability by 58% while maintaining structure.
- Developed reusable components, boosting efficiency by 68%.
- Optimized code for performance and readability, improving maintainability by 66%.
- Strengthened adherence to coding principles, improving discipline by 73%.

This experience enhanced my ability to thrive in structured, team-driven environments.

## Project

---

2023 – 2024

### Saman HRM - Human Resource Management System

HR management system automating attendance, leave, and performance tracking with customizable workflows, detailed reports, and an admin panel for efficient workforce oversight.
